

**SMART INDUSTRIAL INNOVATION AS ENABLER TO DRIVE NEW VALUE CHAINS  
FOR TEXTILES AND AEROSPACE**

Dear member,

Hardly any other industry has been as severely affected by the COVID-19 pandemic as the international aerospace industry. Nevertheless, the current situation also offers the opportunity to explore new smart industrial innovations and to accelerate the development towards sustainable green technology.

**Here the EU-funded INNOSUP project GALACTICA offers support!**

With a **total budget of EUR 5 million**, of which **EUR 4 million** are allocated directly **to support European SMEs**, GALACTICA project aims to connect the European aerospace and textile industries based on new advanced manufacturing methods. Interested companies and organizations will be supported by numerous funded activities (e.g. webinars, workshops, hackathons, on-site visits, matchmaking events), to learn from other sectors and to identify new potential business partners. Eight European partners (from Austria, Belgium, France, Germany, Greece, Italy, Portugal and Spain) of the textile, aerospace and advanced manufacturing industry have joined forces to form the GALACTICA consortium. The cross-sectoral cooperation promotes the generation of new industrial value chains and innovative processes and products. Therefore two calls are foreseen where participating companies and organizations can apply for vouchers, either for a new project concept (20 kEUR each) or for the launch of a specific cross-sectoral innovation product (100 kEUR each).

In order to design GALACTICA project activities, we want to identify as many interested actors as possible, their competences in their respective industry as well as specific market needs. The German partner Süderelbe AG – represented in EACP by Hamburg Aviation - is carrying out the following survey addressed to all EACP companies and organizations on behalf of the INNOSUP - GALACTICA project of the EU:

**[»» Link to start the survey ««](#)**

**Your participation in the survey is important to us, as your company/organization could become one of the beneficiaries of the project.**

Answering the questionnaire takes about 10-15 minutes. The deadline for participation is **27/11/2020**. For more information, you find attached a leaflet of the project and if you have

any questions, please feel free to contact us: Silvia de los Santos, (+34 954 46 13 52), email: [silvia.santos@corporaciontecnologica.com](mailto:silvia.santos@corporaciontecnologica.com)

We appreciate your participation in the survey.

**GET INVOLVED! JOIN THE GALACTICA SPACE!**

**GALACTICA | Smart industrial innovation as enabler to drive new value chains for textiles and aerospace**
